BCS Academy Sprint & Christmas Plan

Fourteen days, 45 minutes a day, from a working prototype to a fast, findable, trusted site that's out of beta. Then a clear run to Christmas.

THE GOAL

By Thursday 5 November, BCS Academy is on its own domain, every unit has its own Google-findable page, it loads fast on a phone, and it's tested by real students. By Christmas Eve it's earning, ranking and collecting reviews.

SPRINT	DAILY TIME	DEADLINE	FOR
Fri 23 Oct to Thu 5 Nov 2026	45 minutes, 14 days: 10.5 hours	Thursday 24 December 2026	Ben Smith · v1 · 22 Oct 2026

01 · AT A GLANCE

The whole plan on one page

The content is done. What's missing is everything that makes a site findable, fast and trusted. Two weeks fixes the foundations; seven more weeks turns them into users and money.

10.5 h
Total sprint time: 14 × 45 min

12
Unit pages Google can find, up from roughly 1 today

≥ 90
Lighthouse mobile performance target (up from a 3 MB single page)

v1.0
Out of beta on Thu 5 Nov, with 10 exit criteria met

The 14 days

DAYS	THEME	ENDS WITH
1–3	**Foundations.** Name, domain, GitHub, hosting, analytics, legal pages	BCS Academy live on its own domain, measured
4–7	**Make Google see it.** Real URLs, a page per unit, sitemap, Search Console	Sitemap submitted; v0.9 deployed
8–11	**Fast, useful, trusted.** Speed, landing copy, error reporting, sign-ups, booking	Lighthouse ≥ 90; tutoring bookable
12–14	**Test and launch.** Real students, fix the top 5, launch v1.0	"Beta" label removed; launch posts out

By Christmas Eve

FOUND
≥ 90%
of submitted pages indexed; first search clicks in Search Console

USED
100+
email subscribers; weekly visitors rising four weeks in a row

EARNING
£480+
from tutoring, plus January "Mock Ready" seats sold (business plan base case)

Your 45 minutes, every day

0:00–0:05 · READ
Read today's card. Copy its prompt into a Claude Code session.

0:05–0:35 · BUILD
Claude builds; you check every change on your phone. Push when it works.

0:35–0:45 · SHIP & LOG
Deploy, tick the box, and write one line in the daily log (page 11).

Rule: if a day overruns, stop at 45 minutes and carry the rest to the buffer days (Fri 6 to Sun 8 Nov). Your own study time doesn't move.

02 · THE DATA

Market, competitors and the numbers that matter

Google is where students search, video is where they hang out, and the big revision sites barely serve CCEA. That's the opening.

3,655
A level Maths entries in NI, summer 2026, the most popular subject
CCEA provisional entries

33,740
NI A level entries in 2026, up 4.5% on 2025
CCEA provisional entries

91%
of UK searches go to Google. SEO here means Google.
StatCounter, June 2026

+32%
bounce probability as mobile load time goes from 1 s to 3 s
Google/SOASTA, 2017

29%
of secondary pupils in England & Wales have had private tutoring (45% in London)
Sutton Trust, 2026 (no NI figure)

67% · 60%
of UK children use YouTube and TikTok; 95% use at least one social or video platform
Ofcom, 2026

175,035
NI GCSE entries in 2026: the next market up
CCEA provisional entries

23,540
Leaving Cert higher level Maths candidates in 2025 (Physics: 6,592)
Secondary source; check SEC

Competitors

WHO	SCALE	PRICE	CCEA GAP = YOUR OPENING
Save My Exams	2.5M+ registered students (all time, Feb 2026), 430k educators; forecast +41% revenue in 2025; about 8.2M visits (Semrush, May 2025)	Subscription; price varies by account	Our check found only past papers for CCEA Maths and Physics
Physics & Maths Tutor	9.6M page views and 560k users a month (self-reported)	Free, ad-funded	Built around English boards
Seneca	14M+ users worldwide, 300k+ teachers (self-reported)	Freemium	General, not CCEA-mapped
Up Learn	Premium A level video courses	£74.99/month, or £319.99 until summer 2027 exams	English boards; 10× your Pro price
Local tutors	Everywhere, limited hours each	≈ £20–£40 an hour (NI directory estimates)	Expensive; no free resource behind them
CCEA	The exam board: specs, papers, mark schemes	Free	Documents, not teaching. Link to them.

WHAT THE DATA SAYS

Students already pay a lot (Up Learn charges £319.99 for one A level until the 2027 exams) and search on Google for almost everything. The scale players treat CCEA as an afterthought. A fast, CCEA-only site that ranks for "CCEA A2 1 maths" can win Northern Ireland without beating anyone nationally.

Audit: today versus v1.0

The site works brilliantly for someone who's already on it. To Google and to a slow phone, it barely exists. Four technical problems cause most of that.

PROBLEM	WHY IT HURTS	FIX (SPRINT DAY)
Links are #/…	Google's own guidance: don't use URL fragments to load different content, because Googlebot can't reliably resolve them. In practice Google sees one page.	Real URLs (/maths/as-1/) with the History API, plus redirects from old # links. DAY 4
One 3 MB HTML file	Every visitor downloads all 12 units, physics included, before anything shows. Slow on phones, and bounce risk rises with every second.	Split into per-page files; physics and textbooks load only when opened. DAY 8
No page titles or descriptions	Search results would show the same title for everything, with no reason to click.	One real page per unit with its own title, description, headings and intro text. DAYS 5, 9
Hosting limits	Netlify's free plan for new accounts (from Sept 2025) is 300 credits a month: about 15 credits per deploy and about 20 per GB served (third-party figures). At ~0.9 MB per visit, that's roughly 8,000 visits a month with 10 deploys. After that the site is suspended until the month ends.	Move to Cloudflare Pages (free, 500 builds a month, static bandwidth not metered per third-party reviews), deploying from GitHub. DAY 1
No data	You can't see visitors, popular units or broken pages.	Cookie-free analytics plus Search Console. DAY 3
No trust signals	No reviews, contact, error reporting, privacy page or domain.	Own domain, legal pages, "report an error", reviews later. DAYS 1, 3, 10
Code not backed up	The code lives in one temporary session. GitHub pushes currently fail (403).	Reconnect GitHub and install the Claude app on the repo. DAY 1

v1.0: the ten exit criteria (out of beta when all are ticked)

- ☐ Live on its own domain over HTTPS, branded BCS Academy
- ☐ Every unit and section has a real URL, title and description
- ☐ sitemap.xml submitted; at least 90% of it indexed
- ☐ Lighthouse mobile: performance ≥ 90, accessibility ≥ 95
- ☐ Core Web Vitals "good": LCP ≤ 2.5 s, INP ≤ 200 ms, CLS ≤ 0.1
- ☐ Analytics and Search Console live, with a baseline recorded
- ☐ Privacy notice, terms and contact pages
- ☐ "Report an error" on every chapter and lab
- ☐ Tested by 5+ real students; top 5 issues fixed
- ☐ Code on GitHub; every push deploys automatically

04 · SPRINT WEEK 1

Days 1–7: foundations and Google

Each row is one 45-minute session. The italic line is the prompt to give Claude. Tick the box when its "done when" is true.

DAY	TASK	DONE WHEN
☐ 1 Fri 23 Oct	**Lock the name, domain and plumbing** Decide on "BCS Academy". Check and buy a domain (try bcsacademy.co.uk first). Reconnect GitHub and install the Claude app on the repo. Create a free Cloudflare Pages project linked to the repo. *"Push the branch, set up Cloudflare Pages from GitHub, and connect my domain."*	Domain bought; repo connected; first automatic deploy works
☐ 2 Sat 24 Oct	**Rebrand to BCS Academy** Name, logo mark, page titles, footer, About page and the meta description, across all three subjects. *"Rename BcsMaths to BCS Academy everywhere, keep the subject colours, and redirect bcsmath.netlify.app and bcs35 to the new domain."*	No "BcsMaths" left on screen; old addresses redirect
☐ 3 Sun 25 Oct	**Measure, and be legal** Cloudflare Web Analytics (cookie-free). Verify the domain in Google Search Console. Add privacy, terms and contact pages. *"Add cookie-free analytics, and privacy, terms and contact pages written for under-18 users."*	Visitors show in analytics; Search Console verified
☐ 4 Mon 26 Oct	**Real URLs** Switch routing from #/m1/… to /maths/as-1/… with the History API. Old # links redirect to the new ones, and the host serves the app for every path. *"Replace hash routing with History API routes, keep every old #/ link working, and add the host rewrite rules."*	Every page has a clean URL; refreshing any page works
☐ 5 Tue 27 Oct	**A real page per unit and section** The build pre-renders static HTML for the 12 units, the physics sections and each spec topic, with unique titles, descriptions, an H1 and real text. *"Pre-render a static HTML page for every unit, topic and physics section at build time, with its own title, meta description and H1."*	View-source on any unit shows its content, not an empty shell
☐ 6 Wed 28 Oct	**Search plumbing** sitemap.xml, robots.txt, canonical tags, Open Graph tags, breadcrumb and Course structured data, and a 404 page. *"Generate sitemap.xml and robots.txt, add canonical, Open Graph and Course/Breadcrumb JSON-LD, and a 404 page."*	The Rich Results Test passes on 3 sample pages
☐ 7 Thu 29 Oct	**Ship v0.9 and tell Google** Deploy. Submit the sitemap. Request indexing for the home page and the 12 unit pages with URL Inspection. Check every unit on your phone.	Sitemap status "Success"; 13 indexing requests made

WEEK 1 RULE

If Day 4 or 5 runs over, move everything else back a day. Real URLs and pre-rendering are the two jobs that decide whether Google can find you; everything after them depends on them.

05 · SPRINT WEEK 2

Days 8–14: fast, useful, trusted, launched

DAY	TASK	DONE WHEN
☐ 8 Fri 30 Oct	**Speed** Split the bundle: each page loads only its own code. Physics (≈ 860 KB) and the textbooks load on demand. Inline KaTeX's CSS for above-the-fold maths; preload fonts. *"Split the app so each subject and the physics engine load only when needed; get Lighthouse mobile performance to 90 or more."*	Lighthouse mobile ≥ 90 on home, a maths chapter and a physics lab
☐ 9 Sat 31 Oct	**Landing copy that ranks** Each unit page gets 150–300 words of real text: what's examined, paper length, weighting, topics, and how to use the site. Add a short FAQ per unit. *"Draft landing text and a 4-question FAQ for each unit page from the spec data; mark anything I must check."*	You've checked all 12 pages; no fact left unverified
☐ 10 Sun 1 Nov	**Trust** "Report an error" button on every chapter and lab (sends the page and a note). A "Fixed this week" log. A "Founder" line on the home page. *"Add a report-an-error button that emails me the page URL and the message, plus a public fixed-this-week page."*	A test report reaches your inbox
☐ 11 Mon 2 Nov	**Turn visitors into customers** Email sign-up with a free printable checklist. A tutoring and courses page with a booking link and Stripe payment links (a parent as account owner). *"Add an email sign-up with a downloadable checklist PDF, and a tutoring page with booking and payment links."*	You can sign up and book yourself end to end
☐ 12 Tue 3 Nov	**Real students** Give 5–10 classmates one task each ("find the SHM lab and do a drill"). Watch one of them use it without helping. Collect issues in a list.	10 or more issues logged, ranked by how many people hit them
☐ 13 Wed 4 Nov	**Fix the top 5 and polish** Fix the five worst issues. Keyboard and screen-reader pass. Re-run Lighthouse. Check every unit on a phone and a laptop, in light and dark. *"Fix these five issues, then run an accessibility pass and re-check Lighthouse on mobile."*	All 10 v1.0 criteria ticked (page 3)
☐ 14 Thu 5 Nov	**Launch v1.0** Remove the beta label. Post in year group chats. Email 5 heads of department. Post the first 3 short videos. Record baseline numbers in the log.	Launch posts out; baseline recorded

BUFFER · FRI 6 TO SUN 8 NOV

Catch up on anything that overran. If you're on track, rest. Week 3 starts the Christmas plan.

IF YOU ONLY HAVE 20 MINUTES

Do the "done when" check, ship what works, and log it. A shipped half-task beats an unshipped whole one.

How BCS Academy gets found

SEO for a small, focused board comes down to three things: Google can read every page, every page answers a real search, and other sites point to you.

1 · TECHNICAL

- Real URLs, no # routes
- Static HTML for each page
- sitemap.xml, robots.txt
- Unique <title> and description
- Canonical, Open Graph, JSON-LD
- Core Web Vitals "good"
- HTTPS on your own domain

2 · CONTENT

- One page per unit and topic
- 150–300 words of intro text
- A FAQ that answers real questions
- Internal links: unit → topic → lab
- Descriptive headings (H1, H2)
- Updated each term; dates shown

3 · AUTHORITY

- School websites and teachers linking
- Video descriptions linking back
- A Google Business Profile (tutoring)
- Mentions in NI student groups
- Never buy links

Page title formula and keyword map

Titles follow "[Unit] [subject] revision: [what's in it] | BCS Academy". The searches below are examples; find real ones in Search Console once data arrives.

PAGE	EXAMPLE TITLE	SEARCHES IT SHOULD WIN
/maths/as-1/	CCEA AS 1 Maths revision: pure maths, every spec point | BCS Academy	ccea as maths revision · ccea as 1 maths
/further-maths/a2-1/	CCEA A2 1 Further Maths: complex numbers, matrices, proof | BCS Academy	ccea further maths a2 · ccea fp revision
/physics/as-2/	CCEA AS 2 Physics: waves, photons, astronomy with live labs | BCS Academy	ccea as physics unit 2 · ccea physics waves
/physics/shm/	Simple harmonic motion for CCEA A2 Physics: live lab and drills | BCS Academy	shm ccea physics · simple harmonic motion a level
/maths/a2-1/trigonometry/	CCEA A2 1 trigonometry: identities, proofs, R cos(θ − α) | BCS Academy	ccea a2 trig identities · double angle proof

Weekly Search Console routine (10 minutes, Sundays)

1. **Pages → Not indexed:** fix the top reason first.
2. **Performance → Queries:** find searches with impressions but few clicks, and rewrite those pages' titles.
3. **Queries ranked 8–20:** add a paragraph or FAQ to that page. These are the quickest wins.
4. **Core Web Vitals:** anything not "good" goes on next week's list.
5. **Links:** note any new site linking to you and thank them.
6. **Write it down** in the scorecard: impressions, clicks, average position.

EXPECT

A new site can take anywhere from a few days to several weeks to be crawled and indexed, and Google gives no fixed timeline. Submitting a sitemap and using URL Inspection helps. Rankings build over months, which is why the technical work goes first.

07 · TO CHRISTMAS

Week by week to 24 December

Seven weeks after launch. Building drops to 45 minutes, four days a week (3 hours). With tutoring, that keeps you inside the 7-hour cap from the business plan.

w/c 9 Nov · Index and listen
Fix every Search Console indexing error. Ask 2 teachers to spot-check a unit. Start tutoring (target: 2 students).

w/c 16 Nov · Announce Mock Ready
January course on sale (8 seats × 2 groups, £30). 3 videos a week. Email list live on every page.

w/c 23 Nov · Content that ranks
Two guides: "What's on CCEA A2 1 Maths" and "CCEA Physics practicals explained". First reviews collected.

w/c 30 Nov · Halfway check
Mock Ready at 10+ seats. Pro waitlist page live. Re-check Lighthouse and fix regressions.

w/c 7 Dec · Lead magnet
Free "Christmas revision planner" PDF for email sign-ups. Tutoring holiday slots open.

w/c 14 Dec · The Christmas push
"12 days of revision" video series. Final Mock Ready reminder. Thank-you email to the list.

w/c 21 Dec · Deadline week
Tick the checklist below by Thu 24 Dec. Then stop and rest; January starts with the mock course.

The Christmas deadline checklist

- [ ] v1.0 live on your own domain, out of beta
- [ ] ≥ 90% of sitemap pages indexed
- [ ] First 100 search clicks in Search Console
- [ ] Lighthouse mobile ≥ 90 on the 3 key templates
- [ ] 100+ email subscribers
- [ ] Weekly visitors up four weeks running
- [ ] Code on GitHub, auto-deploying, backed up
- [ ] 3+ tutoring students; £480+ earned
- [ ] Mock Ready: 10+ seats sold for January
- [ ] 5+ genuine reviews, with permission to publish
- [ ] 2 teachers have spot-checked a unit
- [ ] 0 open "critical" error reports
- [ ] Stripe (parent owner), records spreadsheet, ICO check done
- [ ] Plan for January written on one page

IF YOU FALL BEHIND

Protect three things, in this order: the site being findable (indexing), Mock Ready selling, and your own revision. Videos and guides can slip a week; those three can't.

Every part of the business, on one page

AREA	NOW (OCTOBER 2026)	BY CHRISTMAS
Brand	Called BcsMaths, though it covers Physics too	BCS Academy, own domain, one logo, one voice
Product	12 units, 204 maths points, 36 physics sections, 87 labs	v1.0: fast, findable, error-reporting, tested
Customers	Students (users) and parents (payers)	First paying families; first teacher fans
Offer	Free course only	Free course, tutoring £20/h, Mock Ready £30, Pro waitlist
Channels	None running	School chats, 3 videos a week, Google, email list
Sales	No way to pay	Booking link and payment links; refund policy
Support	None	Contact page, error reports answered within 24 h
Tech	One 3 MB file, manual uploads, no backup	GitHub, auto-deploy, per-page files, analytics
Legal	"Not affiliated" notice only	Privacy, terms, parent-owned Stripe, ICO check, AccessNI
Finance	£0 in, ~£0 out	Records sheet; separate account; under the £1,000 allowance
Team	You (and Claude)	You, plus 2 teacher reviewers and 5 student testers

Profit and time

≈ £80
fixed costs for year one: domain, ICO £52, AccessNI £16. Hosting £0.

1.5% + 20p
per card payment (Stripe, UK cards): 65p on a £30 course

£5.6K
12-month base-case revenue (business plan); £2.8K to £9.6K range

£33–£44
per hour from group courses, versus about £16 from 1:1 tutoring

WHERE YOUR HOURS GO (NOV–DEC)	HOURS / WEEK	WHAT IT EARNS
Building and SEO (45 min × 4 days)	3	Long-term traffic; compounds
Tutoring	3	£60 a week
Videos and outreach (batched on Sundays)	≤ 1	Visitors and sign-ups
Business total	**≤ 7**	**The term-time cap from the business plan**

Price check: Up Learn charges £319.99 for one A level until the 2027 exams. BCS Pro at £29 a year is about a tenth of that, a gap you can lead with.

09 · FUTURE

Expansion, in the right order

Each stage opens only when the one before has proved itself. The gates stop you expanding before the core is working.

#	MOVE	MARKET SIZE (DATA)	GATE TO START	WHY THIS ORDER
1	**Own CCEA A level Maths, Further Maths, Physics**	3,655 A level Maths entries a year in NI, plus Year 13s	Now	Built already; win it first
2	**BCS Pro** (sync, mock papers, packs)	1–3% of active users (estimate)	Accounts working; 1,000 visitors a week	Revenue without your time
3	**Schools licence** (class codes, teacher view)	NI schools offering CCEA A levels	2 schools piloting free; teachers recommending	One sale reaches a whole class
4	**CCEA GCSE** Maths, Further Maths, Physics	175,035 NI GCSE entries a year, all subjects	£500 a month; A level pages ranking	Huge market, same board, same parents
5	**BCS tutors**: recruit top students and graduates	29% of England & Wales pupils have had tutoring	Your own slots fully booked for 6 weeks	Sells your demand without your hours
6	**Other CCEA A levels** (Chemistry, Biology)	Smaller than Maths each	A paid subject expert to write and check	Same model; needs content you can't write
7	**Leaving Cert** (Republic of Ireland)	23,540 higher Maths and 6,592 higher Physics candidates (2025)	NI saturated; a partner teacher in the ROI	A big neighbouring market
8	**AI tutor upgrade** (paid tier)	Existing users	Pro revenue covers API costs twice over	Cost grows with every use; wait for revenue

NEVER EXPAND INTO

- English exam boards head-on against Save My Exams
- An app-store app before the website has paid off
- Paid ads before organic channels convert
- Features no customer has asked for

LONG-TERM PICTURE (2028+)

BCS Academy: the CCEA-first learning platform for Northern Ireland. Free course, paid Pro, school licences and a tutor network, with your A level results and university as the story behind it.

What could go wrong, and the rules that prevent it

RISK	ODDS	PREVENTION
The sprint overruns into study time	High	Hard stop at 45 minutes; buffer days; carry tasks forward, never stay up.
Google doesn't index pages	Medium	Real URLs, pre-rendered HTML, sitemap, URL Inspection; fix Search Console errors weekly.
Site suspended for hosting limits	Medium	Move to Cloudflare Pages; smaller per-page files; fewer manual deploys.
Losing the code	Medium	Fix GitHub on Day 1; every change pushed; keep the latest zip offline.
A content error embarrasses you	Medium	Error button, teacher spot-checks, fixes within 24 hours, public log.
Rebrand confuses existing users	Low	Redirect every old address; one notice saying "BcsMaths is now BCS Academy".
Copyright complaint over spec quotes	Low	Link to CCEA's papers; ask CCEA before charging for anything that quotes the spec.
Fake-review or claims breach	Low	Only genuine reviews (banned since April 2025); never promise grades.

Ten rules for the sprint

1. 45 minutes. Stop on time.
2. Ship every day, even if it's small.
3. Test on a phone before you push.
4. One task per day. No side quests.
5. If it doesn't help Google, speed or trust, it waits.
6. Every fact on a landing page is checked.
7. No new content until v1.0 ships.
8. Log every day, good or bad.
9. Real students beat your own opinion.
10. Exams first, always.

Sprint log

One line a day. Tick, note, number. If you skip a day, write why.
